

Bug & Issue Report

INSB WIE Mentorship Program website — farhana-rh.github.io/mentorship

Tested 20 September 2026 on the live site. Pages covered: index.html, mentors.html, mentor.html (all 11 profiles + invalid slug).

Viewports: 280, 320, 375, 390, 412 px phones; 667×375 landscape; 768 px tablet; 1024 / 1366 / 1440 px desktop.

Chromium with mobile emulation, plus review of the CSS/JS.

3 High	6 Medium	6 Low	1 Info

Summary of issues

ID	Issue	Category	Severity
BUG-01	Header logos collapse or disappear on small phones	Layout / responsive	High
BUG-02	Meeting-preference radio groups are not validated before sending	Form validation	High
BUG-03	NSU ID accepts letters and any length	Form validation	High
BUG-04	Whitespace-only text passes the required check	Form validation	Medium
BUG-05	PDF check only looks at the file extension/MIME type	Form validation	Medium
BUG-06	Raw browser error shown when the connection drops	Form submission	Medium
BUG-07	“Other” interest area does not require an explanation	Form validation	Low
BUG-08	Registration takes 6–63 s with no time-out	Form submission	Medium
BUG-09	Oversized images — mentors page downloads ~2.9 MB	Performance	Medium
BUG-10	Form controls use 15 px text — iOS Safari zooms in on focus	Mobile usability	Medium
BUG-11	Text below 12 px on mobile	Mobile usability	Low
BUG-12	“Back to all mentors” link is too small to tap	Mobile usability	Low
BUG-13	Horizontal overflow on 280 px screens	Layout / responsive	Low
BUG-14	Accessibility issues (automated audit)	Accessibility	Low
BUG-15	No custom 404 page	Navigation	Low
BUG-16	Mentor grid stays at 2 columns on large screens	Layout / responsive	Info

Severity key

High	Blocks or corrupts registrations, or breaks a core element of the site for many users.
Medium	Noticeable defect affecting a large share of users; a workaround exists.
Low	Polish, consistency or best-practice issue.
Info	Improvement suggestion; not a defect.

Each issue on the following pages includes: where it occurs, steps to reproduce, expected vs. actual behaviour, a suggested fix and screenshot evidence. Checks that passed are listed on the final page.

BUG-01 Header logos collapse or disappear on small phones

High

Category: Layout / responsive · **Where:** All pages — header, viewports ≤ 390 px

The header keeps both call-to-action buttons (“About Mentors” / “Register”) at full size and lets the brand area shrink instead. At 375 px the brand text is truncated to “W... / C...”; at 320 px the logo strip is 25 px wide; at 280 px it is 0 px and all three partner logos are gone.

STEPS TO REPRODUCE

1. Open any page on a phone (or set the browser width to 375, 320 or 280 px).
2. Look at the header.

EXPECTED

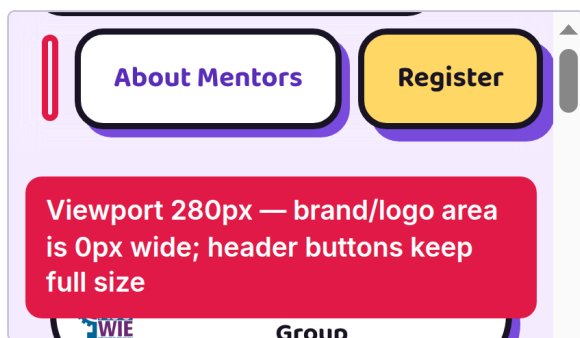

Partner logos and programme name remain visible; buttons shrink or collapse into a menu first.

ACTUAL

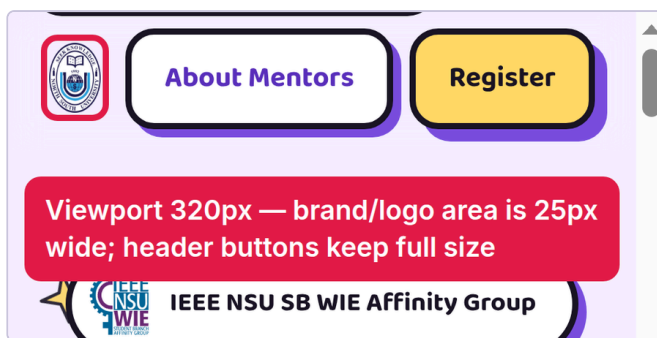

Logos are cropped/hidden while the buttons keep full desktop size.

Suggested fix: Give `.brand` a minimum width and let `.header-actions` shrink; below ~400 px show only the “Register” button (or a compact icon for “Mentors”) and hide the brand text instead of the logos.

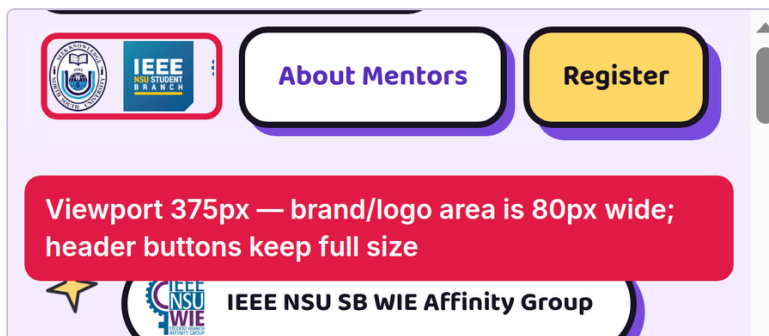

EVIDENCE

280 px — logo area 0 px wide

320 px — logo area 25 px wide

375 px — logo area 80 px wide

Category: Form validation · **Where:** index.html — registration form (Availability section)

The three radio groups (meeting format, frequency, time) have no `required` attribute and no custom check. The form is sent to the server without them; the server rejects it and its raw technical message (with internal field names) is shown to the applicant.

STEPS TO REPRODUCE

1. Fill every field except the three meeting-preference groups.
2. Tap “Submit Application”.

EXPECTED

The browser blocks the submit immediately and highlights the missing choice.

ACTUAL

Request goes to the server (~2 s), then the text “Missing required fields: meetingFormat, meetingFrequency, meetingTime” appears under the button.

Suggested fix: Add `required` to one input in each radio group (or check the groups in `form.js` before submitting) and map server error codes to friendly messages.

EVIDENCE

The screenshot shows the registration form with a red box highlighting the meeting format options: In-person, Online, Hybrid, and No preference. Below this are sections for Preferred meeting frequency (Bi-weekly, Monthly, No preference) and Preferred meeting time (Weekday morning, Weekday afternoon, Weekday evening, Weekend, Flexible). At the bottom, there is a CV upload section. A red text box at the bottom of the form states: "Meeting format / frequency / time radio groups have no required attribute (any required = False); the form is sent to the server without them".

No radio in the three groups is marked required

The screenshot shows the registration form after submission. The "Submit Application" button is highlighted in yellow. Below the button, a red text message reads: "Missing required fields: meetingFormat, meetingFrequency, meetingTime". Below this message, there is a link to "Trouble with the form? Email ieeewie.nsu@gmail.com".

Server-side error text displayed to the user

BUG-03 NSU ID accepts letters and any length

High

Category: Form validation · **Where:** index.html — “NSU ID” field

The field only has `inputmode="numeric"`, which changes the phone keyboard but does not validate. Any text is accepted and stored.

STEPS TO REPRODUCE

1. Type ABC12345XYZ in NSU ID.
2. Complete the rest of the form and submit.

EXPECTED

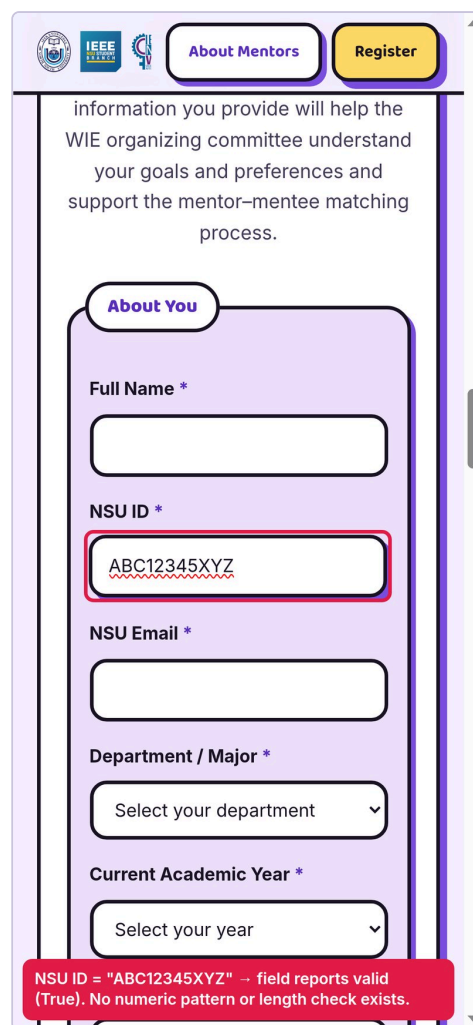

Only a valid numeric student ID (fixed length) is accepted.

ACTUAL

The field reports valid and the value is sent to the server, which also accepts it.

Suggested fix: Add `pattern="[0-9]{10}"` (adjust to the real ID format), `minlength/maxlength` and a matching check in the Apps Script.

EVIDENCE

information you provide will help the WIE organizing committee understand your goals and preferences and support the mentor-mentee matching process.

About You

Full Name *

NSU ID *

ABC12345XYZ

NSU Email *

Department / Major *

Select your department

Current Academic Year *

Select your year

NSU ID = "ABC12345XYZ" -> field reports valid (True). No numeric pattern or length check exists.

Letters in NSU ID — field reports valid

BUG-04 Whitespace-only text passes the required check

Medium

Category: Form validation · **Where:** index.html — Full Name, “Why join” and other text fields

HTML `required` accepts a value made only of spaces. The value is trimmed only when the payload is built, so an empty name reaches the server.

STEPS TO REPRODUCE

1. Type five spaces in “Full Name”.
2. Fill the rest and submit.

EXPECTED

Field is flagged as empty.

ACTUAL

Field reports valid; the server receives an empty name.

Suggested fix: Trim values before `reportValidity()` or add `pattern=".*\S.*"` to text fields.

EVIDENCE

Full Name containing only spaces reports valid

BUG-05 PDF check only looks at the file extension/MIME type

Medium

Category: Form validation · **Where:** index.html — CV upload

Any file renamed to `.pdf` is accepted because only `file.type` and size are checked.

STEPS TO REPRODUCE

1. Rename a text file to `fake.pdf`.
2. Choose it as the CV.

EXPECTED

File is rejected as not a real PDF.

ACTUAL

No error; the file is uploaded to Drive as a CV.

Suggested fix: Read the first bytes with `FileReader` and require the `%PDF-` signature (and check it again in the Apps Script).

EVIDENCE

The screenshot shows a mobile web interface for the IEEE WIE Mentorship Website. At the top, there are logos for IEEE and WIE, and buttons for 'About Mentors' and 'Register'. Below these, there are four buttons: 'Weekday afternoon', 'Weekday evening', 'Weekend', and 'Flexible'. A section titled 'CV' contains the text 'Upload your latest CV/Resume (PDF, max 2MB) *'. Below this text is a 'Choose File' button, and next to it, the filename 'fake.pdf' is displayed. Below the filename, there is a note: 'This will be used only for program-related purposes and mentor-mentee matching.' At the bottom of the form is a large yellow 'Submit Application' button. Below the form, there is a link: 'Trouble with the form? Email ieeewie.nsu@gmail.com'. At the very bottom, a red banner contains the text: 'A plain-text file renamed to "fake.pdf" is accepted with no error (only the MIME type and size are checked, not the file content)'.

Plain-text file named fake.pdf accepted without error

BUG-06 Raw browser error shown when the connection drops

Medium

Category: Form submission · **Where:** index.html — form submit

If the request fails, the JavaScript error text is written straight into the status area.

STEPS TO REPRODUCE

1. Fill the form.
2. Turn off Wi-Fi / mobile data.
3. Tap "Submit Application".

EXPECTED

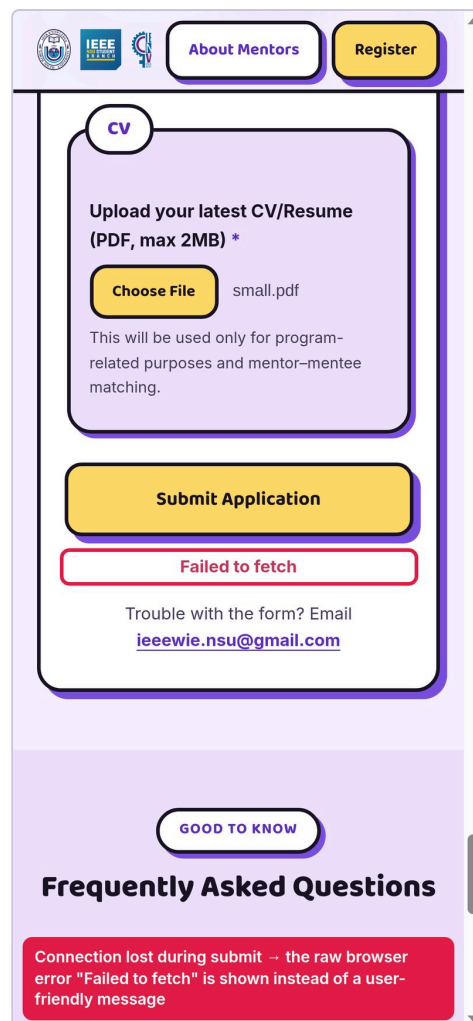

A clear message such as "We couldn't reach the server. Please check your connection and try again."

ACTUAL

The text "Failed to fetch" is displayed.

Suggested fix: Catch network errors and show a friendly message with a retry hint.

EVIDENCE

"Failed to fetch" displayed to the applicant

BUG-07 “Other” interest area does not require an explanation

Low

Category: Form validation · **Where:** index.html — Areas of interest

Ticking “Other” reveals a “Tell us more” box, but it can be left empty, so the submission just says “Other”.

STEPS TO REPRODUCE

1. Tick “Other” under areas of interest.
2. Leave the text box empty and submit.

EXPECTED

Text box becomes required while “Other” is ticked.

ACTUAL

Form submits with no explanation.

Suggested fix: Toggle `required` on the text box together with the checkbox.

EVIDENCE

The screenshot shows the IEEE WIE Mentorship website's 'Areas of Interest' section. The 'Other' option is selected, and a 'Tell us more' text box is displayed. A red box highlights the text box, and a red callout bubble states: "Other" is ticked and the text box appears, but it is not required (required=False) — can be left empty.

Revealed text box is not required

BUG-08 Registration takes 6–63 s with no time-out

Medium

Category: Form submission · **Where:** index.html — form submit

Measured on the live backend: 6–9 s with a 30 KB CV on a fast connection, 33 s on a Fast-3G connection and 63 s on Slow-3G with a 1.9 MB CV. The CV is sent as base64 inside JSON (~35 % larger). There is no client time-out, so on a stalled connection the progress bar runs forever.

STEPS TO REPRODUCE

1. Attach a ~1.9 MB PDF.
2. Submit on a slow mobile connection.

EXPECTED

Upload finishes in a reasonable time or the user is told to retry.

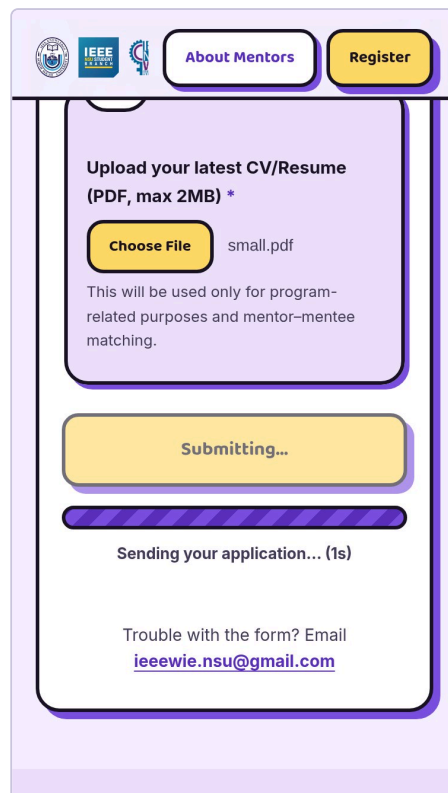

ACTUAL

Up to a minute of waiting; an indeterminate bar with an elapsed counter is the only feedback; no time-out.

Connection	CV size	Time to success
Fast (unthrottled)	30 KB	6.3 – 8.8 s
Fast (unthrottled)	1.9 MB	6.9 s
Fast 3G (750 kbps up, 150 ms)	1.9 MB	32.8 s
Slow 3G (400 kbps up, 400 ms)	1.9 MB	62.7 s

Suggested fix: Add an `AbortController` time-out (~90 s) with a retry message; consider a 1 MB CV limit; use `XMLHttpRequest` upload progress for a real percentage.

EVIDENCE

Indeterminate progress bar during submit

BUG-09 Oversized images — mentors page downloads ~2.9 MB

Medium

Category: Performance · **Where:** mentors.html, all pages (logos)

Mentor photos of 600–1000 px (up to 943 KB each) are displayed at 72 px. The NSU logo is 1648×2000 px (216 KB) and the WIE logo 1080×1080 px (214 KB), both shown at ~30 px on every page.

STEPS TO REPRODUCE

1. Open mentors.html on a mobile connection.
2. Check the network transfer size.

EXPECTED

Well under 500 KB of images.

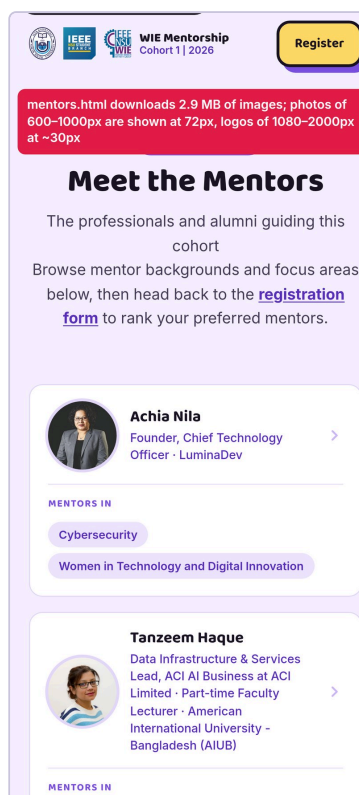

ACTUAL

About 2.9 MB of images; logos alone add ~430 KB to every page load.

File	Actual size	Displayed at	Transfer
tasmia-tabassum-rahman.png	800×800	72×72	943 KB
achia-nila.png	1000×994	72×72	760 KB
tanzeem-haque.png	603×604	72×72	345 KB
tahmina-akhter.png	505×505	72×72	227 KB
nsu_logo.png	1648×2000	28×34	216 KB
wie-logo.png	1080×1080	30×30	214 KB
zarrin-tasnim.jpg	800×800	72×72	130 KB

Suggested fix: Export photos at ≤ 200 px (WebP/JPEG, ~10–15 KB each) and logos at ≤ 120 px; add `width / height` attributes to avoid layout shift.

EVIDENCE

Mentor list — large source images shown as 72 px avatars

BUG-10 Form controls use 15 px text — iOS Safari zooms in on focus

Medium

Category: Mobile usability · **Where:** index.html — all inputs, selects and textarea

iOS Safari automatically zooms the page when a focused control has a font-size below 16 px. All form controls compute to 15.04 px, so the page jumps on every field on iPhone.

STEPS TO REPRODUCE

1. Open the registration form in Safari on an iPhone.
2. Tap any text field.

EXPECTED

Page stays at the same zoom level.

ACTUAL

Page zooms in and has to be pinched back out.

Suggested fix: Set `font-size: 16px` on `input`, `select`, `textarea`.

EVIDENCE

Step?

Register as a Mentee

Complete the application below. The information you provide will help the WIE organizing committee understand your goals and preferences and support the mentor-mentee matching process.

About You

Full Name *

NSU ID *

NSU Email *

Department / Major *

Select your department

Text inputs, selects and textarea use 15.04px font-size — iOS Safari zooms the page on focus when the size is below 16px

Computed font-size of form controls is 15.04 px

BUG-11 Text below 12 px on mobile

Low

Category: Mobile usability · **Where:** mentors.html cards; mentor.html sidebar

“Mentors in” card labels and the header line “Cohort 1 | 2026” render at 10.56 px; profile sidebar headings render at 11 px.

STEPS TO REPRODUCE

1. Open mentors.html or any mentor profile on a phone.

EXPECTED

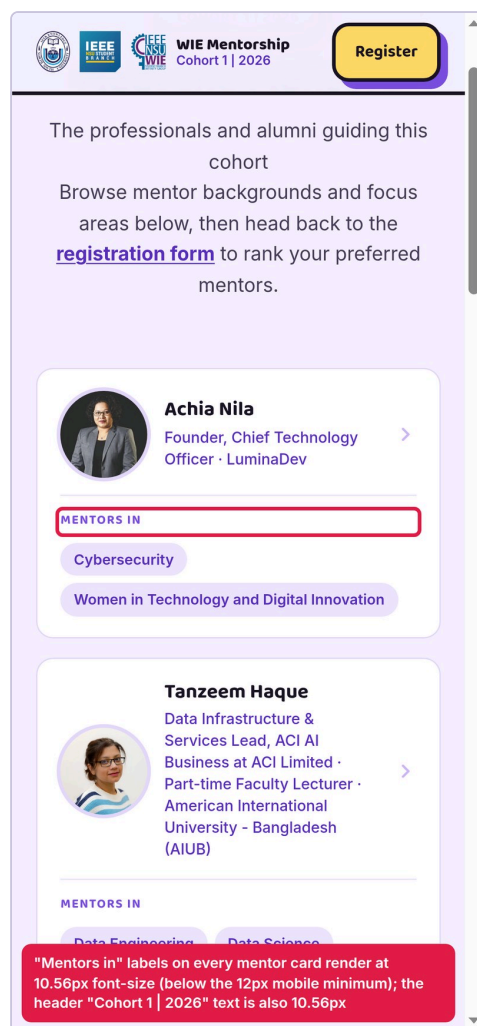

Body/label text at 12 px or larger.

ACTUAL

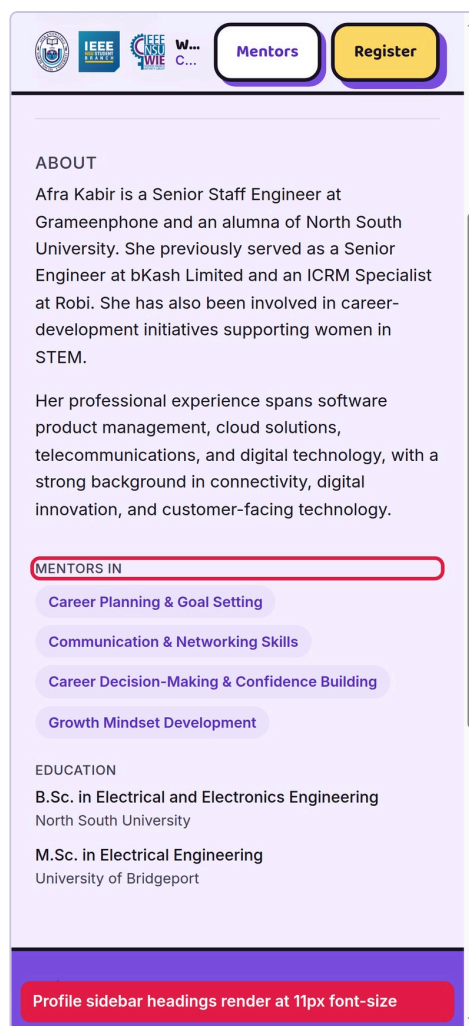

10.56 px and 11 px labels.

Suggested fix: Raise the label styles to at least 12 px.

EVIDENCE

“Mentors in” label — 10.56 px

Profile sidebar heading — 11 px

BUG-12 “Back to all mentors” link is too small to tap

Low

Category: Mobile usability · Where: mentor.html

The link is 21 px tall (13 px text). The recommended minimum touch target is 24×24 px (44 px on iOS).

STEPS TO REPRODUCE

1. Open any mentor profile on a phone.
2. Try to tap “Back to all mentors”.

EXPECTED

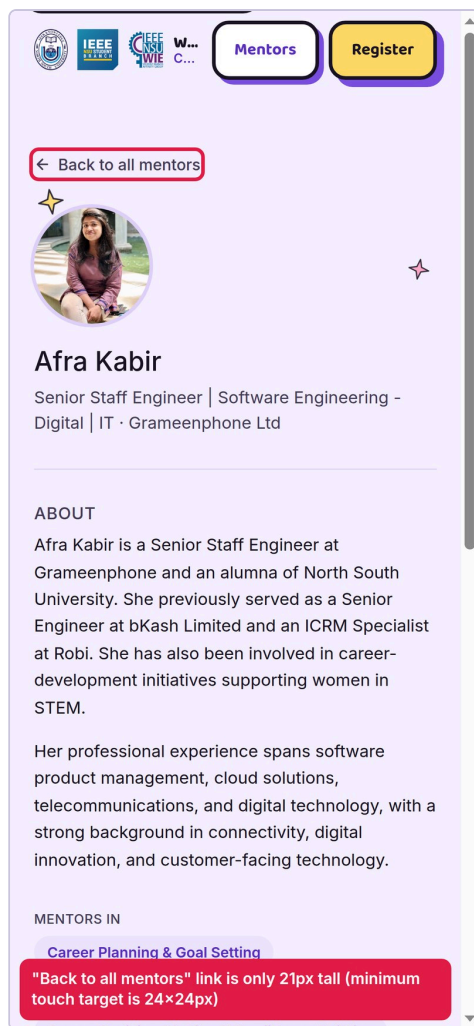

Comfortable tap target.

ACTUAL

21 px tall link, easy to miss.

Suggested fix: Add vertical padding (e.g. `padding: 10px 0`) to the link.

EVIDENCE

Back link measures 21 px tall

BUG-13 Horizontal overflow on 280 px screens

Low

Category: Layout / responsive · **Where:** index.html — registration form

At 280 px (Galaxy Fold closed) a form fieldset is 289 px wide. The page appears fine only because `body { overflow-x: hidden }` masks it, so the right border of the section is cut off.

STEPS TO REPRODUCE

1. Set the viewport to 280 px.
2. Scroll to the registration form.

EXPECTED

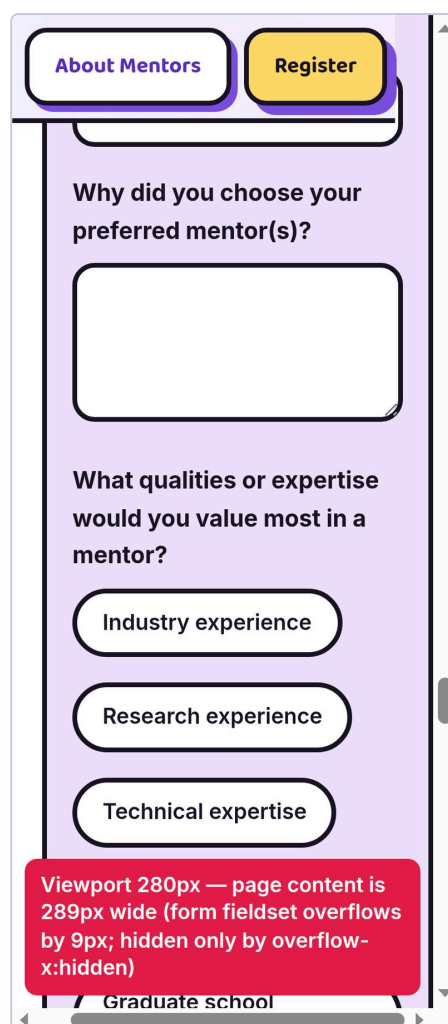

Content fits inside the viewport.

ACTUAL

Section is 9 px wider than the screen; right edge clipped.

Suggested fix: Reduce fieldset padding or chip min-width below 320 px; remove the reliance on `overflow-x: hidden`.

EVIDENCE

Form section wider than the 280 px viewport

BUG-14 Accessibility issues (automated audit)

Low

Category: Accessibility · Where: All pages

Findings from an axe-core scan and manual review of the markup.

STEPS TO REPRODUCE	EXPECTED
1. Run an accessibility checker on each page.	No violations; each image has an accurate description.
	ACTUAL
	See list below.

- **mentors.html** — heading order: mentor names are `<h3>` directly under the page `<h1>` with no `<h2>` .
- **mentor.html** — the `<aside>` landmark is nested inside `<main>` .
- **All pages** — the North South University logo is labelled `alt="IEEE NSU Student Branch logo"` , identical to the IEEE logo next to it (index.html lines 28–29 and 486–487). Screen readers announce the same text twice and never announce “NSU”.
- **All pages** — the header WIE logo has `alt=""` while the same logo in the footer is labelled.

EVIDENCE — INDEX.HTML, LINES 28–30 (REPEATED AT 486–488)

```

```

EVIDENCE — AUTOMATED SCAN (AXE-CORE 4.10) RESULTS

Page	Rule	Impact	Element
index.html	—	No violations	—
mentors.html	heading-order	Moderate	<code>h3.mentor-card-name</code> (11 instances)
mentor.html	landmark-complementary-is-top-level	Moderate	<code>main > aside</code>

Suggested fix: Fix the heading level, move the `<aside>` out of `<main>` (or use a `<section>`), and give each logo its own correct alt text.

BUG-15 No custom 404 page

Low

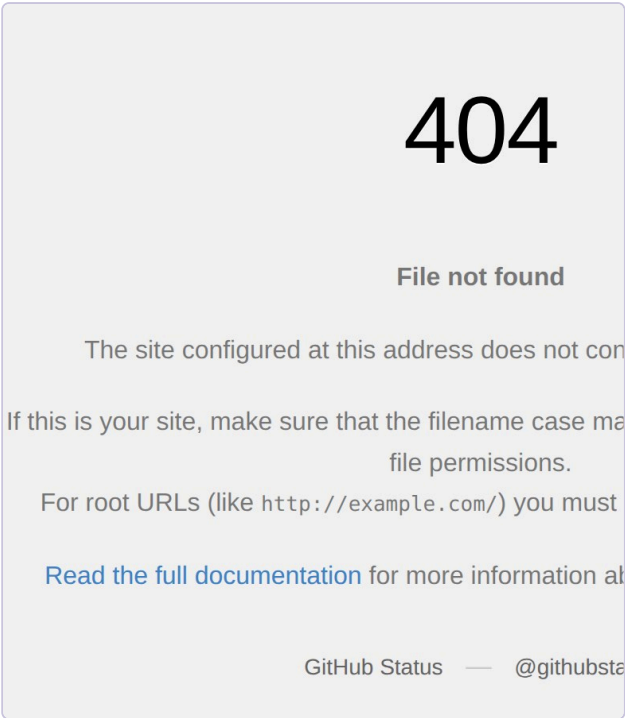

Category: Navigation · Where: Any wrong URL under /mentorship/

Mistyped or old links show the default GitHub Pages error page, with no branding and no link back to the site. (Wrong mentor slugs are handled correctly by mentor.html.)

STEPS TO REPRODUCE 1. Open https://farhana-rh.github.io/mentorship/mentorz.html	EXPECTED Branded “page not found” with links to Home / Mentors / Register. ACTUAL Plain GitHub 404.
---	--

Suggested fix: Add a 404.html to the repository root.

EVIDENCE

Default GitHub 404 page

BUG-16 Mentor grid stays at 2 columns on large screens

Info

Category: Layout / responsive · **Where:** mentors.html ≥ 1024 px

On laptops/desktops the grid keeps two ~500 px cards, leaving large empty areas inside each card.

STEPS TO REPRODUCE

1. Open mentors.html at 1440 px width.

EXPECTED

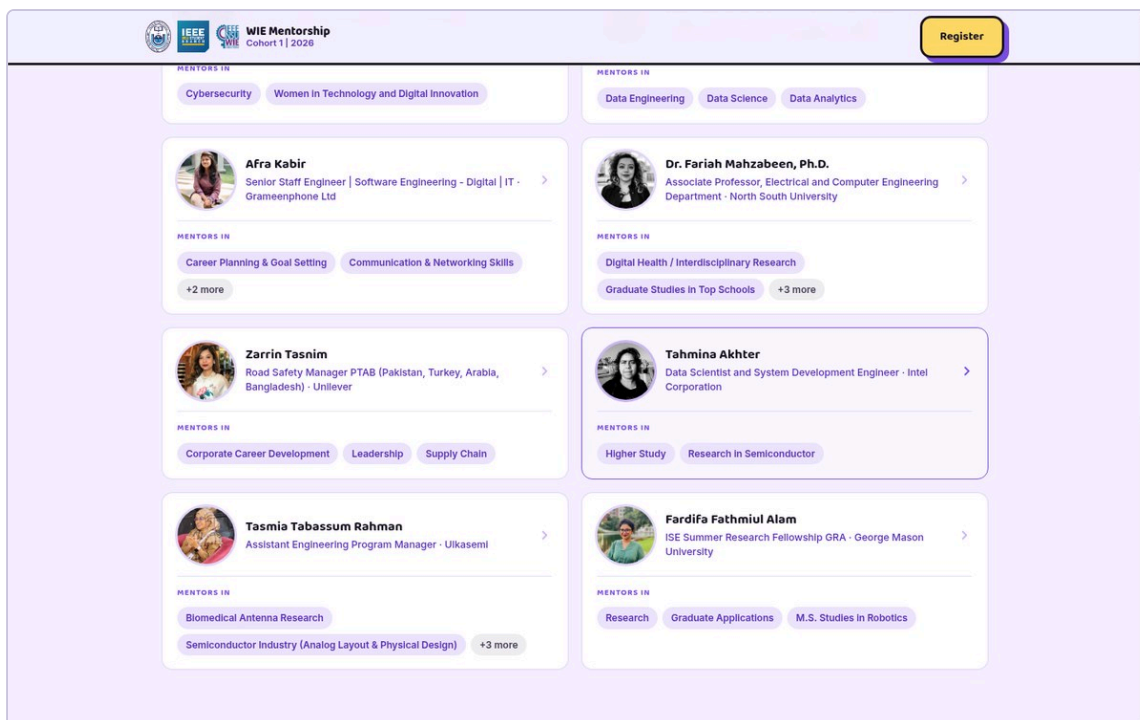

Three or four columns on wide screens.

ACTUAL

Two very wide cards.

Suggested fix: Add a 3-column breakpoint at ≥ 1024 px.

EVIDENCE

1440 px — two-column grid

Checks that passed

- No JavaScript console errors, failed requests or broken links on any page; all 11 mentor profiles load; an invalid mentor slug shows a proper “Mentor not found” state.
- No horizontal scrolling on any page at 320 px and above (280 px: see BUG-13).
- Required-field, e-mail, duplicate-mentor, at-least-one-interest / goal, non-PDF and > 2 MB CV checks all work.
- The submit button is disabled while sending, preventing double submissions; a duplicate NSU ID / e-mail is rejected by the server; the form resets and shows a confirmation after success.
- Touch interactions (chips, radios, FAQ accordion, header buttons, mentor cards) work; the sticky header does not cover anchored headings; landscape and tablet layouts are clean.
- Mentor cards without a photo fall back to initials correctly; all social links open the correct destination.

Submission timings (live backend)

Connection	CV size	Time to success
Fast (unthrottled)	30 KB	6.3 – 8.8 s
Fast (unthrottled)	1.9 MB	6.9 s
Fast 3G (750 kbps up, 150 ms)	1.9 MB	32.8 s
Slow 3G (400 kbps up, 400 ms)	1.9 MB	62.7 s
Fast — server rejects missing radio groups	30 KB	~2 s
Fast — server rejects duplicate NSU ID / e-mail	30 KB	~2.2 s
